

Minecraft

How to use the minecraft server

- [Minecraft](#)

Minecraft

To register on the minecraft server, you must first register on [TailsTalk 2](#) and then enter the [Whitelist Requests](#) channel. Then you may enter your desired username and go to [TailsCraft](#) and join using that username.

You must then initially do `/register <password> <password again>`

If your password would be "676767" then you would run `/register 676767 676767`

Subsequent logins will use `/login <password>`

If your password was 676767 you would run `/login 676767`

This is how to use minecraft.
